DOON LIBRARY
& Research Centre

ANNUAL REPORT
2022-23

Introduction

The year 2022-23 marks an important landmark in the evolution of the Doon Library & Research Centre. The construction of the new library building, that was reported in the previous year's report, was finally over and we were able to shift to our new home. This new four-storeyed building occupies a prominent place at Lansdowne Chowk, just a short distance from our old premises in Parade Ground. The new building has been made possible by a generous grant from the National Airports Authority of India under its CSR initiative with additional financial support from the Doon Smart City Limited, which included it as part of its project and undertook its construction and furnishing.

We started shifting into the new building on December 20, 2022. It took almost a month to complete the process of shifting and we finally opened our doors to our members on January 16, 2023. The old premises were handed back to the Education department, who had allowed us use of that space in 2006 when we were desperately looking for some place to start the library. The constraint of space and the shortcomings of a make-shift library premises that had dogged our existence over the past sixteen years, since our very inception, was now finally over. We now had enough space for library stacks, reading room, library and office staff and a spacious hall, with seating for about one hundred persons where we could organize our programmes on a regular basis, in the new building.

After shifting to the new premises our presence in the city has become very visible. As a result the library has been attracting many new members. Our two reading spaces – one for library members with seating for about 150 readers and open during library hours from ten in the morning to five in the evening, and the other open to the public from eight in the morning to eight at night with availability of newspapers, are generally full through the day. In fact, we have been receiving requests from our young members to keep the library open till late at night, a request we are unable to meet owing to shortage of staff.

In addition to books and reading rooms we also have three other attractions in the new building: (i) a large computer centre with twenty eight seats for the members to access the internet and do their own work; (ii) a folk museum of Uttarakhand which houses the private collection donated to the library by the well-known cultural worker of Kumaon, Shri Jugal Kishore Petshali, as well as valuable collection of ancient coins and postage stamps issued by various countries on Mahatma Gandhi donated by our Chairman ShriSurjit Kishore Das and paintings by Shri Yashodhar Mathpal; and (iii) a fairly large collection of line drawings by the well-known artist Rathin Mitra,

reproductions of cartoons on Mahatma Gandhi published in newspapers in various countries, and facsimile of stories about the independence movement from various newspapers of Uttarakhand. The Rathin Mitra Drawings, Gandhi cartoons and newspaper facsimiles are displayed on easels in the top floor.

Progress of the Library

During the year 974 books were added bringing the total number of books in the library to 32,242 at the end of the year. These consisted of 23,579 books purchased by the library and 8,663 books received in donation from different people. Of he books added during the year 333 consisted of books purchased by the library while 641 books were received by donation. The closure of the library during December and January due to shifting of the library had an impact on the pace of acquisition new books. This is evidenced by the month wise data on acquisition of books between April 01, 2022 and March 31 2023 presented in the table below

Books added month-wise: April 2022 to March 2023

Month	Books purchased	Donated books	Total
April	45	79	124
May	20	82	102
June	43	25	68
July	26	07	33
August	115	14	129

January	04	36	40
February	06	04	10
March	00	330	330
Total	**333**	**641**	**974**

Membership of the library at the end of the year stood at 5121 consisting of 4567 annual members and 554 life members. This may be compared to 4668 members at the end of last year – 462 life members and 4206 annual members. Thus 453 members were added during the year, of which 92 were life members and 361 annual members. The month wise figures for new members is presented in the table below.

New members month-wise: April 2022 to March 2023

Month	Annual	Life	Total
April	22	07	29
May	19	03	22
June	30	02	32

January	47	13	60
February	66	20	86
March	102	21	123
Total	**361**	**92**	**453**

The above data clearly shows that once the library reopened and resumed operations there was a big spurt in the number of members. This may be attributed to the new impressive building visibly located at a central place with much better facilities.

Members continued to borrow books as usual. Month wise figures for books borrowed is presented in the following table.

Books borrowed month-wise: April 2022 to March 2023

August	338
September	390
October	376
November	395
December	012
January	282
February	392
March	545

It is noteworthy that there was a steady increase in the number of books borrowed by members after the library started functioning from its new building on January 16, 2023 reaching a high of 545 in March.

Programmes

Talks, Discussions, Book Launches etc.

We at the Doon Library & Research Centre see ourselves as something more than just a repository of books. We seek to be a forum for informed discussion and exchange of ideas on subjects of contemporary and topical significance through talks by local experts, panel discussions, book launches & discussions, presentations, seminars etc. We have special interest in organising discussions on books by local authors in Hindi and English. The idea is to make the library a living institution among the citizens of Dehradun and create a space for such activities. The success of our effort in this direction is testified by the fact that not only are these activities well attended and appreciated by the citizens of Dehradun, but we have also been receiving suggestions and requests from people for discussion on particular books and talks or discussions on specific topics and subjects. We welcome all such suggestions and try our best to respond to them. In the past we were

constrained by the fact that since we did not have our own hall we were dependent on hiring halls outside, which were not always be available within our means. This problem has now been solved since we moved into the new building. We now have a well-equipped hall with seating for about one hundred persons. As a result the number and variety of programmes being organized has increased manifold. Apart from book launches, discussions, talks by invited guests, we have also been screening short films, documentaries and the occasional feature film, as well as music programmes. These are very well attended and appreciated by the people.

During the year only nine programmes were organized. The small number was partly due to the slowly recovery from the aftermath of Covid and partly due to the disruption caused to our working on account of the anticipated shifting of the library to the new building. We had been assured that the building would be ready for use any time after July. We were finally able to move only in December. Before that considerable time was spent in planning for the shifting. After moving to the new building it took us a couple of months to organize the new premises and make them suitable for organizing programmes.

The following programmes were organized during the year:

Progress since 2006

The library has been making steady progress over the last sixteen years since its inception in 2006. It would not be out of the way to claim that it has earned a place for itself in the hearts and minds of the discerning public as an important depository of quality contemporary books, a place for quiet study despite the severe limitations of space that it faced till recently, an important centre promoting serious discussion on literature in Hindi and English and on important topical issues and as a preferred locale for book launches, discussions and conversations with authors.

Over the last sixteen years the number of books in the library has steadily increased from 2156 at the end of March 2007 to 32,242 at the end of March 2023, an increase of 1395 per cent which comes to an average of 87 per cent per year. Similarly, the progress in the number of members over the years has been equally dramatic. From no members at the end of March 2007 the number kept steadily increasing year by year to reach 5,121 at the end of March 2023. The year wise progress in the number of books and membership of the library is depicted in the following tables and accompanying graphics.

Serving the Youth

Over the years the library and its reading rooms have become very popular with the youth of the city. On any day they can be seen sitting for hours together and reading. Their number has increased in the new premises. Many young readers use the library to prepare for some competitive examination. The library has also been catering to their special needs by providing competition related books and magazines. Since the demand of such material

has been increasing over the years, we have been stocking multiple copies of the more popular books and magazines. It is indeed a matter of great satisfaction to us that over the years over 100 young library users have been able to qualify for some job.
