

## LIBRARY

The year 2010-11 marks a significant landmark in the development and growth of the Doon Library & Research Centre. The institution has now reached a level of maturity so that it can legitimately claim to have emerged as an important facility for the citizens of Dehradun. There is now a steady stream of members and readers to the library all through the day. Demands are now being made to increase reading hours and increase the number of seats. A particularly satisfying feature is the large number of young people who make use of our library. Many are preparing for various competitive examinations. At the same time there has been a steady increase in the number of students and research scholars visiting the library.

During the year the library continued to grow in terms of the number of books and number of members. At the end of the year the library had a total collection of 13,663 books. Simultaneously membership of the library increased to 880 consisting of 867 annual members and 134 life members. In addition there were also two institutional members – the Doon University and the Survey of India. Month-wise data on total books, and membership is shown in the following below.

## Month-wise data on total number of books and membership : 2010-11

This is evidenced by the data on the number of books borrowed every month. It varied from a low of 532 to a high of 819. Month-wise information on the number of books borrowed is shown below.
